

Optos Cloud™

“With real time back up and accessibility from any of my 15 sites, OptosCloud has made our data more secure and safe, while making it more accessible from anywhere...”

David M. Brown, MD

Retina Consultants of Houston, Houston, TX

Groundbreaking accessibility – Patient data can be reviewed from any computer or tablet with network access

Optos Devices

Fully automatic, increased functionality, simplified workflow, and network access

Referral to any Doctor

Data Security By Design

Image and patient data which is routinely backed up in a practice is costly and time-consuming. This new feature of the OptosAdvance™ platform - OptosCloud - automatically saves images and other data minimizing the impact on your organization and finances. Regulatory requirements are met and the highest level of security is maintained by adhering to the strongest encryption and security measures.

Assisting with CFR Regulations

If a medical office is not compliant with the Code of Federal Regulations (CFR 1.2) they are at risk of fines. OptosCloud covers these requirements, as well as 10-12 other requirements that are often overlooked, giving your organization guaranteed protection 24/7.

1. All Covered Entities should have a process in place to securely backup ‘retrievable exact copies of ePHI’. (CFR 164.308 (7) (ii) (A)).
2. All Data must be backed up off site. HiPAA final security rule (CFR 164.308(a)(7)).

Zero Effort – No Staff Time

OptosCloud Automatic Archive eliminates the need to archive **optomap** or other images to DVDs or a NAS. This function will ensure that most of a practice’s images and diagnostic reports are securely stored off-site. It will free up staff to work on patient-focused and revenue-generating activities rather than managing the practice’s backup data.

Multi-Office Integration

Across multiple offices, practitioners can combine **optomap**, and data from other device modalities, to create a single repository in OptosAdvance for comprehensive review of patient examinations.

Real Time Backup

With OptosCloud, images and diagnostic reports captured within the practice automatically archive to OptosCloud eliminating staff time as well as the need to archive to other storage media. Data stored on OptosCloud can be securely accessed from any browser at any time.
